Annex 1: Data Collection Tool

Questionnaire

Patients' information

1. Age (years) :

2. Hospital settings ☐ Al-Shifa Hospital ☐ Nasser medical complex

3. BMI?

4. Parity: ☐ Nulliparous ☐ Multiparous: number of births

5. Antenatal Care : ☐ Yes ☐ No

6. Previous history of PPH : ☐ Yes If yes how many times?.............. ☐ No

7. Previous history of Caesarean section : ☐ Yes ☐ No

8. Previous history of Gynecological operations : ☐ Yes ☐ No

9. Previous history of Rupture of the uterus in childbirth : ☐ Yes ☐ No

10. Previous history of multiple gestation: ☐ Yes ☐ No

10. Previous history of multiple gestation: ☐ Yes ☐ No

11. Baby weight : ☐ <4000 g ☐ >4000 g

12. History of APH in this current pregnancy? ☐ Yes ☐ No

13. Placental site: ☐ normally-sited, ☐ Low lying, ☐ previa

14. was this pregnancy: ☐ induced? ☐ spont?

15. Birth weight of baby?...................

16. delivery: ☐ term, ☐ post-term , ☐ pre-term

17. current history of chorioamnionitis? ☐ Yes ☐ No

18. history of polyhy..? ☐ Yes ☐ No

19. History of intrahepatic cholestasis? ☐ Yes ☐ No

20. History of coagulation diseas? ☐ Yes ☐ No

21. any anticoagulant? ☐ Yes ☐ No

if yes: ☐ aspirin, ☐ clexan , when it was stopped?..................

22. anemia ☐ Yes ☐ No

Prevention of Postpartum Hemorrhage (PPH) : Active management of III stage of labor:

1. Give Oxytocin 10 unit IM or IV injection with delivery of the anterior shoulder or immediately after delivery for the fetus

☐ Yes ☐ No
if not: what is the dose and route?................

2. Delay cord clamping for at least 1-3 minutes

☐ Yes ☐ No

3. Deliver the placenta using Controlled Cord Traction (CCT)

☐ Yes ☐ No

4. Perform uterine massage to the fundus of the uterus through the woman's abdomen until the uterus is contracted

☐ Yes ☐ No

5. Repeat uterine massage every 15 minutes for the first hour

☐ Yes ☐ No

6. Document all procedures, medications given, assessment findings

☐ Yes ☐ No

For high risk cases :

1. Give Methergine IM (1 ml : 0.25 mg) After delivery and exam to confirm complete placental delivery?

☐ Yes ☐ No

2. Oxytocin 40 units in 1000 cc NS at a rate of 250 mm/hour and/or Misoprostol 800 – 1000 mcg PR

☐ Yes ☐ No

3. are these measures done routinely as prophylaxis to PPH according to national protocol?

☐ Yes ☐ No
